

Name : Kerverdo

First name : Raymond

Age : 62 years

Academic :

DUT applied biology, option food industries in Caen in 1974

License of Biochemistry at the University of Sciences of Valrose (Nice) in 1988

Course professional:

- early career in 74 in the dairy (Camembert President, French Emmental)
- a long stage in the pharmaceutical industry (Searle) 1979 to 1990 (Toxicology and Teratology)
- a brief stint in the chemistry of silicone (Dow Corning)
- Since 1991 applications laboratory in Robertet (Grasse). Work is not lacking in diversity: developing the finished product or new concepts, evaluating fragrances, working with perfumer, meeting the expectations of customers and doing the Secretary of the works council to "lost moments"!

Summary of your speech within the school:

To give the basics of the formulation (EDT, cosmetic and cleaning products) to understand the interactions and incompatibilities with the fragrance. To create fragrances specifically for technical applications. To anticipate performance issues, stability and change in color depending on the media.

Anecdote!!! :

I had to prepare an insecticidal aerosol for New Caledonia. Not having the insecticide assets available, the aerosol was prepared without it. A few weeks later, I get a call from the client to congratulate us on the quality of the scent but to make a remark on effectiveness of insecticide formulation. He had to pursue the insect while spraying the product to kill him. I explained to him that the insect had died of cold and we have a good laugh!
